

Website hosting - How can it be green and ethical?

Webarchitects is a long established social enterprise and co-operative, an ethical, responsible business with strong values and high standards. We're down-to-earth, with real humans to speak to.

We especially welcome enquiries from activist groups, charities and progressive campaigns.

Our Sheffield datacentre is powered by Good Energy's 'green' electricity.

We specialise in providing high security green hosting and virtual servers using free libre/open-source software.

Fast, reliable virtual private servers, powered by 100% renewable energy running on ultra-efficient servers.

We offer good support, systems administration, co-location and online tools for all, from the very small to the international.

We can advise on collaboration tools like encrypted and open discussion lists and discussion forums, to help people to work together.

Software installation and modification.

Content management systems.

Cloud-based encrypted online sharing.

Server design, support & maintenance.

Expert advice on tight data security, safe from viruses and snooping.
